There are approximately 80,000 chemicals registered for use in the U.S. The Centers for Disease Control and Prevention reports that hundreds of these chemicals are present in our bodies. The simple truth is, we are surrounded by toxins. In fact, we are exposed to more environmental toxins in one day than our grandparents were in an entire lifetime. These toxins build up over time in our system and can greatly impact our health on numerous levels. Lowering your toxicant load - overtime can help shift your health.
